Special Issue: AUSTRIB '94

Editorial
G.W. Stachowiak iii
Thermo-elastic hydrodynamic (TEHD) lubrication
P. Pahud 1
Comparison between three turbulent models—application to thermohydrodynamic performances of tilting-pad journal bearings
L. Bouard, M. Fillon and J. Frêne 11
An experimental investigation of thermal effects in circular and elliptical plain journal bearings
M.-T. Ma and C.M. Taylor 19
Determining the oxidation stability of lubricating oils using sealed capsule differential scanning calorimetry (SCDSC)
W.F. Bowman and G.W. Stachowiak 27
Relationship between tribological performance of liquid crystals and their molecular structure
S. Mori and H. Iwata 35
Wear of metal stirring rods in molten aluminium and suspensions of alumina particles in molten aluminium
A.W. Batchelor, N.P. Hung and T.K. Lee 41
An experimental evaluation of squeeze film dampers without centralizing springs
M.A. Rezvani and E.J. Hahn 51
Two-dimensional dynamic simulation of a continuous foil bearing
M.J. Braun, F.K. Choy, M. Dzodzo and J. Hsu 61
Pressure and flow characteristics in a shallow hydrostatic pocket with rounded pocket/land joints
M. Dzodzo, M.J. Braun and R.C. Hendricks 69
Analysis of the effects of surface pitting and wear on the vibration of a gear transmission system
F.K. Choy, V. Polyshchuk, J.J. Zakrajsek, R.F. Handschuh and D.P. Townsend 77

Calendar V

Number 2

The hardnesses of poly(methylmethacrylate)
B.J. Briscoe, P.D. Evans, S.K. Biswas and S.K. Sinha 93
A review of the performance of engineering materials under prevalent tribological and wear situations in South African industries
C. Allen and A. Ball 105
Dynamics of rough slider bearings: effects of one-sided roughness/waviness
K. Tønder 117
Super-low friction of MoS_2 coatings in various environments
C. Donnet, J.M. Martin, Th. Le Mogne and M. Belin 123
Influence of surface roughness on friction and scuffing behaviour of cast iron under sparse lubrication
O. Jinno, M.R. Tyagi and Y. Kimura 129
An approach to improve the load-carrying capacity of zinc dithiophosphate
X. Ren-Gen, Z. Jing-Lin, D. Jun-Xiu, C. Yao, Y. Xiao-Zeng and Z. Yong-Fa 137
Static tilt characteristics of aerostatic rectangular double-pad thrust bearings with compound restrictors
T. Nakamura and S. Yoshimoto 145
The role of metals in the oxidative degradation of automotive crankcase oils
A.U.C. Maduako, G.C. Ofunne and C.M. Ojinnaka 153
Practical contaminant analysis of lubricating oil in a steam turbine-generator
H.S. Ahn, E.S. Yoon, D.G. Sohn, O.K. Kwon, K.S. Shin and C.H. Nam 161

Index

Tribological properties of nickel-base nanocrystalline coatings sputter-deposited on austenitic stainless steel
K. Bouslykhane, J.P. Villain and P. Moine 169
Book Reviews 175
About the Authors I
Calendar III

Number 3

Part I: East German Special Issue

Editorial
Dr W. Hübner iii
Tribology in Eastern Germany—A retrospective editorial
W. Hübner and G. Fleischer 177
The use of sintered metal bearings for high sliding velocities
R. Junghans, J. Neukirchner, D. Schumann and K.-H. Lippman 181
Peculiarities of erosion—corrosion processes
W. Hübner and E. Leitel 199
Characterization of wear protective coatings
G. Schmidt and S. Steinhäuser 207

Part II: General Papers

Modelling of severe wear: a survey of the contributions of the Technical University of Zittau to tribology
G. Beckmann, P. Dierich, R. Gellrich, J. Gotzmann and F. Pietschmann 215
Fundamental investigations of electrical conductor fretting fatigue
Z.R. Zhou, A. Cardou, S. Goudreau and M. Fiset 221
Experimental assessment of hydrostatic thrust bearing performance
T.A. Osman, M. Dorid, Z.S. Safar and M.O.A. Mokhtar 233
Animation of the evolution of surface finish with wear
T.A. Spedding 241
Some considerations of slideway friction characteristics by observing stick-slip vibration
E. Marui, H. Endo, M. Hashimoto and S. Kato 251
Tribology and surface engineering at Argonne National Laboratory
A. Erdemir 263
Calendar I

Number 4

Fretting fatigue in elastic contacts due to tangential micro-motion
A.H. Elkholy 265
Contact of surface asperities in wear
E. Students and J. Rudzitis 275
Effects of partial-grooving on the performance of spiral groove bearings: analysis using a perturbation method
Y. Huang and D.-G. Chen 281
Leakage from labyrinth seals under stationary and rotating conditions
H.A. El-Gamal, T.H. Awad and E. Saber 291
Investigation into the effects of orifice size, offset and overclamp ratio on the lubrication of slipper bearings
E. Koç and C.J. Hooke 299
Thin layer activation for measuring fretting wear and material transfer in iron alloys
P. de Baets and K. Strijckmans 307
Partial EHL analysis of rib-roller end contact in tapered roller bearings
W. Wang, P.L. Wong and Z. Zhang 313
Friction and wear behaviour of Thordon XL and LgSn80 in sliding against plasma-sprayed Cr_2O_3 coatings
J.E. Fernández, Y. Wang, H.J. Montes, J.M. Cuetos, M. Miranda and A. Rincón 323
Friction and wear behaviour of plasma-sprayed Cr_2O_3 coatings against steel in a wide range of sliding velocities and normal loads
J.E. Fernández, Y. Wang, R. Tucho, M.A. Martin-Luengo, R. Gancedo and A. Rincón 333
Optimum film thickness of thin metallic coatings on silicon substrates for low load sliding applications
D.-S. Jang and D.E. Kim 345
Obituary I
News III
Calendar VII

Number 5

Surface damage under dynamic loading
S.N. Buravova, A.A. Goncharov and J.N. Kiselev 357
Micromechanics and electrical conductivity of point contacts in boundary lubrication
V.V. Konchits, Y.E. Kirpichenko and N.K. Myshkin 365
Nanostep movement and measurement
S.Y. Tipissev and A.O. Golubok 373
Microtribological problems of physics and mechanics in smooth surface contact
A.I. Sviridenok, A.A. Chizhik and I.F. Sveklo 377
Triboemission, tribochemical reaction, and friction and wear in ceramics under various n-butane gas pressures
K. Nakayama and H. Hashimoto 385
A procedure for evaluating the positioning accuracy of reciprocating friction drive systems
R.-T. Lee, C.-R. Yang and Y.-C. Chiou 395
Power law fluid model incorporated into elastohydrodynamic lubrication theory of line contact
R.C. Bhattacharjee and N.C. Das 405
Characteristics of wear results tested by pin-on-disc at moderate to high speeds
H. So 415
A study on wear resistance of the white layer
Y.Y. Yang, H.S. Fang and W.G. Huang 425
Tribocatalysis reaction during antiwear synergism between borates and Sn(IV) compounds in boundary lubrication
Y. Junbin and D. Junxiu 429
Time-dependent TEHL solution to centrally supported tilting pad bearings subjected to harmonic vibration
P. Yang and C.M. Rodkiewicz 433
Calendar I

Index

Number 6

An investigation of the fretting behaviour of low friction coatings on steel
J.-F. Carton, A.-B. Vannes, G. Zambelli and L. Vincent 445
On the abrasive wear behaviour of mineral filled polypropylene
B.M. Sole and A. Ball 457
A model for the friction of multiphase materials in abrasion
N. Axén, I.M. Hutchings and S. Jacobson 467
Comparison of wear behaviour of plasma-sprayed Al_2O_3 coatings with and without laser treatment
E. Fernández, J.M. Cuetos, R. Vijande and A. Rincón 477
Metallurgical and tribological investigations of aluminium bronze bushes made by a novel centrifugal casting technique
S. Alam, R.I. Marshall and S. Sasaki 487
Steady state analysis of non-circular worn journal bearings in nonlaminar lubrication regimes
A. Kumar and S.S. Mishra 493
Dry sliding wear mechanism for P/M austenitic stainless steels and their composites containing Al_2O_3 and Y_2O_3 particles
M. Vardavoulias, M. Jeandin, F. Velasco and J.M. Torralba 499
A comparative study on the microstructure and tribological properties of Si_3N_4 and TiN films produced by the IBED method
M. Vardavoulias, M. Jeandin, F. Velasco, J.M. Torralba, Z. Da-Ming, L. Jia-Jun, Z. Bao-Liang, L. Wen-Zhi, Z. Xu-Shou and Y. Sheng-Rong 507
Static and dynamic performance characteristics of an orifice compensated hydrostatic journal bearing with non-Newtonian lubricants
R. Sinhasan and P.L. Sah 515
Sliding wear behaviour of ion implanted ultra high molecular weight polyethylene against a surface modified titanium alloy Ti-6Al-4V
C. Allen, A. Bloyce and T. Bell 527
Book Review 535
Announcements I
Calendar III

Number 7

Friction and wear in silicon nitride—steel and cemented carbide—steel pairs in lubricated sliding
T. Morimoto and K. Kamikawa 537
A high shear rate, high pressure microviscometer
P.L. O'Neill and G.W. Stachowiak 547
Multilayer composite ceramic-metal-DLC coatings for sliding wear applications
A.A. Voevodin, J.M. Schneider, C. Rebholz and A. Matthews 559
Non-linear stability analysis of a rigid rotor on tilting pad journal bearings
R. Brancati, E. Rocca and R. Russo 571
Modelling the thermohydrodynamic behaviour of high speed journal bearings
D.T. Gethin 579
On the shear stress of elastohydrodynamic lubrication in elliptical contacts
J.G. Wang and J.J. Ma 597
Elastoplastic finite element analyses of an upsetting-sliding test for the determination of friction at medium and high contact pressure
A. Dubois, J. Oudin and P. Picart 603
Experimental and numerical investigation of the sliding behaviour in a fretting contact between poly(methylmethacrylate) and a glass counterface
A. Krichen, M. Kharrat and A. Chateauminois 615
Calendar I

Number 8

Special Issue: Theoretical and Computational Methods in Friction, Lubrication and Wear

Editorial
D. Eastbury iii
Theoretical and computational methods in friction lubrication and wear
M.J. Adams 625
Molecular aspects of boundary lubrication
D.M. Heyes 627
Dependence of the friction process on the molecular structure and architecture of thin polymer films
P.S. Thomas 631
Basic principles of rough surface contact analysis using numerical methods
R.S. Sayles 639
Finite element methods for contact problems with friction
P. Wriggers 651
Analysis of micro-elastohydrodynamic lubrication for engineering contacts
H.P. Evans and R.W. Snidle 659
Current tools and techniques for EHL modelling
A.G. Schlijper, L.E. Scales and J.E. Rycroft 669
Analytical models of scratch hardness
J.A. Williams 675
Effect of hard and stiff overlay coatings on the strength of surfaces in repeated sliding
S.K. Wong and A. Kapoor 695
